

Hydrogen Americas Summit & Exhibition returns to Washington D.C. in September 2025

Center for Houston's Future joins as Supporting Organization for leading energy forum

HOUSTON, TX – The [Hydrogen Americas Summit & Exhibition](#), a leading forum for the global hydrogen and energy community in the Americas region, will return to Washington D.C. on September 3-4, 2025, at the Gaylord National Resort and Convention Center. Center for Houston's Future is proud to join as a supporting organization that brings together industry leaders, policymakers, investors, and technology providers to advance clean energy solutions across the Americas.

Under the theme "Defining Hydrogen's Role in Americas' New Energy Landscape," the 2025 summit will examine how hydrogen, carbon capture and storage (CCS), and renewables must work in concert with nuclear, geothermal, gas, and LNG to achieve a secure, reliable, and sustainable energy system. The event features a strategic high-level summit, the popular Tech Series stage, and a comprehensive exhibition showcasing the latest advancements in hydrogen technologies and energy solutions.

"Houston's strategic position as an energy capital makes our participation in the Hydrogen Americas Summit essential," said Managing Director Brett Perlman. "This event provides the critical platform needed to forge partnerships and accelerate hydrogen project development across the Americas. As Houston continues to lead the energy transition, we're committed to supporting forums that advance collaborative solutions for our region's energy future."

About Center for Houston's Future

The Center brings business, government, and community stakeholders together to engage in fact-based strategic planning, collaboration, and action on issues of great importance to the region's success. It engages in research, holds community events, and develops leaders. Its current strategic areas include energy, climate, and energy transition with a focus on clean hydrogen.
