Before choosing to **Buy Fioricet (Butalbital) Online**, it is important to understand what the medication is used for. Fioricet is a prescription medication commonly prescribed for tension headaches. It typically contains three main ingredients:

- **Butalbital** – a barbiturate that helps relax muscle contractions involved in tension headaches
- **Acetaminophen** – a pain reliever that reduces headache discomfort
- **Caffeine** – enhances the pain-relieving effects of acetaminophen

Doctors prescribe this medication when standard over-the-counter treatments are not effective. Because it contains butalbital, a controlled substance in many regions, medical supervision is necessary.
